CANCELLED - A Career as a PhD Research Scientist: Preparing to succeed with the federal government

Event cancelled due to speaker illness – an audio recording of this talk will be made at a later date and shared on this page: https://gradstudies.ucdavis.edu/node/35492

What is it like to work for a federal research agency?

How does preparing for a job with the government differ from preparing for an academic position?

This talk will cover federal hiring practices and tips for continuing to do great science once you get the job.

Erin Espeland, PhD, Research Ecologist, USDA Agricultural Research Service

After gaining a BA in Music from Mills College in 1992 and a MS in Biology from San Jose State University in 2000, Erin Espeland received her PhD from UC Davis in Ecology in 2007 and was a Professors for the Future fellow. Her research includes the roles of competition, genetic identity, and maternal effects on restoration establishment. She has recently expanded her research program to track whole-ecosystem recovery after weed removal and restoration; this includes bird, insect and plant populations as well as soil conditions. She joined the USDA-ARS as a research ecologist in 2008. www.ars.usda.gov/pa/nparl/eespeland

Sponsored by the Climate Change, Water, and Society IGERT, GradPathways (Graduate Studies), and the John Muir Institute for the Environment
